

SR 520 Bridge Replacement and HOV Program

Medina to SR 202: Eastside Transit and HOV Project

Sept 21-24 2012

92nd Avenue Northeast: Lots done, more to do

Full SR 520 closure Sept. 21-24 and night work continues through late October

With wet weather on the horizon, Eastside Corridor Constructors crews are kicking work into high gear. Over the Sept. 21-24 full highway closure, crews will install several hundred feet of stormwater pipes underneath the eastbound lanes of SR 520 at 92nd Avenue Northeast to quickly complete an important portion of the highway drainage system. Crews must also close SR 520 mainline lanes to complete the current phase of 92nd Avenue Northeast lid construction – a move that can only be done at night or on weekends. Working at night is reducing overall construction time and keeping this critical work on schedule.

92nd Avenue Northeast nighttime work:

- Drainage system installation work will occur during the Sept. 21-24 full highway weekend closure.
- Lid construction work will continue during the daytime hours and overnight work will take place between 11 p.m. and 5 a.m., Monday through Friday, until late October.

Nighttime construction noise expected: Residents near SR 520 can expect to hear the sounds of power tools, trucks, heavy construction vehicles, pavement saws (weekday only), back-up alarms and light generators.

24-hour construction hotline: If you have a question or a concern about the project's construction activities please call our **24-hour construction hotline: 425-998-5200**.

If you would like regular project updates, please email dan.galvin@gcinc.com and we'll add you to our distribution list for construction news. We want to hear from you, so please tell us how you want to hear from us.
